Vision2021 allows people to return to Schools, offices, stadium or airline flight. etc safely, to return to the way we used to be before covid19 pandemic

The Digital Way To Return To Normal

Vision2021 Digital Health Passport, will provide institution with a digital and smart way to bring people back to a physical location, such as a workplace, colleges and airports.

The solution will enable institutions to verify health credentials for employees, customers and visitors. Privacy will be initial to the solution, and the digital wallet can allow people to maintain control of their personal health information with ganache blockchain technology and share it in a way that is secured, verifiable, and trusted.

How Does Vision2021 Work

Health organization setup for the Vision2021

1. Vision2021 allows Health organizations to sign up and create their individual organizational platform.
2. Vision2021 will help organizations to create the patient's profile with their vaccination information.

Health organization generates a verifiable credential and sends it to the individual

1. Health organization creates a Vaccination Program for individual patients.
2. Health organization generates a QR code and prints and shares it to the patients after getting vaccinated.

Individual receives the credential and loads into their phone so they can share with a verifying organization

1. Individuals download Vision2021 Health Passport mobile software application and sign in with credentials provided by the health organization.
2. After scanning the QR code it generate a digital wallet and they can share with the verifying institution

Verifying institution checks the credential

1. Vision2021 allows institutions to verify individual credential using Vision2021 QR reader

User Story

Steve decided to be vaccinated so he visited Scarborough general hospital. Hospital created their platform to manage the steve profile and vaccination information. Steve receives and signs in with credentials provided by the health organization now steve scan QR code it generate a digital wallet for steve to verify institution and institute verify individual credential using Vision2021 QR reader
